

OpenCart Checkout Test Flows

This document describes the test cases and flows for the OpenCart Checkout process covered in our test suite. It is designed to be easily understandable by both developers and non-technical stakeholders.

How to Run the Tests

To execute the test suite, use the following commands provided in the `package.json` :

- **Run in headless mode:**

```
npm run test
```

- **Run with Playwright UI mode:**

```
npm run test:ui
```

Test Case 1: Checkout Flow via Direct Product Search

Objective: Verify that a new user can register an account, search for a specific product directly by its name, add it to their cart, and successfully complete the checkout process.

Step-by-Step Flow:

1. **Navigate to the Application:** Open the home page.
2. **User Registration:**
 - Navigate to "My account" > "Register".
 - Fill in personal details (First Name, Last Name, Email, Password).
 - Submit the form and verify the account is created successfully.
3. **Search for Product:**
 - Navigate to the home page or use the global search bar.
 - Search for "**iPhone**".
 - Verify the search results match the expected product.
4. **Product Selection & Add to Cart:**
 - Click on the product to open its details page.
 - Note the product's price and quantity.
 - Click "Add to Cart" and verify the success notification.
5. **Checkout Process:**
 - Click the checkout button from the success toast/notification.

- **Billing/Shipping Address:** Fill in the necessary address details (First Name, Last Name, Address, City, PostCode, Country, Region).
- Acknowledge and check the "Terms and Conditions" box, then click "Continue".

6. Order Validation & Confirmation:

- The system displays a breakdown of the order costs.
 - Verify that the Checkout totals (Sub-Total, Flat Shipping Rate, VAT, Total) perfectly match the final Order Confirmation totals.
 - Confirm the order and verify that the final "Order Placed" success page is successfully displayed.
-

Test Case 2: Checkout Flow via "Shop by Category" Navigation

Objective: Verify that a new user can register, browse products through the category menu, add an item to their cart, and successfully complete the checkout process.

Step-by-Step Flow:

1. **Navigate to the Application:** Open the home page.

2. User Registration:

- Navigate to "My account" > "Register".
- Fill in personal details (First Name, Last Name, Email, Password).
- Submit the form and verify the account is created successfully.

3. Browse via Categories:

- Open the "Shop by Category" side menu.
- Select the specific category "**Phone, Tablets & Ipod**".

4. Product Selection & Add to Cart:

- Locate and select the product "**HTC Touch HD**" from the category listings.
- Verify the product page has correctly loaded with the correct breadcrumb trail.
- Note the product's price and quantity.
- Click "Add to Cart" and verify the success notification.

5. Checkout Process:

- Click the checkout button from the success toast/notification.
- **Billing Address:** Fill in the necessary billing details.
- **Shipping Address:** Uncheck the "My delivery and billing addresses are the same" box to reveal the dedicated shipping section. Wait for it to animate, handle any "New Address" radio buttons, and fill it with an international address (e.g., Tuvalu).
- Acknowledge and check the "Terms and Conditions" box, then click "Continue".

6. Order Validation & Confirmation:

- Verify the unit price, quantities, and all aggregate totals (Sub-Total, Shipping, Total) match exactly between the checkout page and the final order confirmation step. (*Note:*

VAT is excluded since the test explicitly selects an international shipping country like Tuvalu).

- Confirm the order and verify the final "Order Placed" success page is successfully displayed.
